Unaudited Financial Results**

*4Q15 Mobile Advertising Revenues Up 118% YOY
Live Conference Call to be Held at 8:00 PM U.S. Eastern Time on March 8*

BEIJING, China, March 9, 2016 — Phoenix New Media Limited (NYSE: FENG), a leading new media company in China (“Phoenix New Media”, “ifeng” or the “Company”), today announced its unaudited financial results for the fourth quarter and fiscal year ended December 31, 2015.

“I’m glad to announce that we beat our guidance for the quarter and close out a challenging year on solid footing despite of numerous headwinds,” stated Mr. Shuang Liu, CEO of Phoenix New Media. “In late 2015, we adjusted and solidified our business strategy to characterize our strategic foray into the emerging frontiers of news delivery, consumption and targeted digital advertising solutions. Through these strategic initiatives, we expect to continue to lead in the development and implementation of cutting-edge targeting technologies that more accurately match users with their desired content and advertisers with their target audience. By staying at the forefront of this rapid evolution in the consumption of news and broader interest-based content, our goal is to build upon our core media DNA and proprietary content expertise in order to continue to provide our users with the high-quality content they’ve come to expect from us and our advertisers with the enhanced advertising solutions they have come to demand.”

Mr. Ya Li, president of Phoenix New Media, stated, “Though 2015 was a tough year for PC advertising, we are excited about the development of our suite of mobile products, which carry enormous monetization potential down the road. The number of average daily active user of Yidian Zixun had grown 4 times year-over-year to over 20 million by the end of 2015. As we continue to amass a larger and stickier user community for our mobile products, we are simultaneously developing personalized, interest-based advertising solutions which we aim to implement later this year. With the soft macroeconomic outlook and the ongoing mobile transition, it is likely that we will continue facing challenges, but we are optimistic about the future potential of our business.”

Fourth Quarter 2015 Financial Results

REVENUES

Total revenues for the fourth quarter of 2015 were RMB430.8 million (US\$66.5 million), as compared to RMB438.1 million in the fourth quarter of 2014.

Net advertising revenues (net of advertising agency service fees) for the fourth quarter of 2015 increased by 2.3% to RMB346.2 million (US\$53.4 million) from RMB338.5 million in the fourth quarter of 2014, primarily due to the 118.2% year-over-year growth in mobile advertising revenues, which was partially offset by the decrease in PC advertising revenues. Paid service revenues for the fourth quarter of 2015 decreased by 15.0% to RMB84.6 million (US\$13.1 million) from RMB99.6 million in the fourth quarter of 2014, primarily due to the decrease of mobile value-added services (“MVAS”)¹ revenue, which decreased by 15.0% to RMB59.6 million (US\$9.2 million) in the fourth quarter of 2015 from RMB70.1 million in the fourth quarter of 2014. Revenues from games and others² for the fourth quarter of 2015 were RMB25.0 million (US\$3.9 million), as compared to RMB29.4 million in the fourth quarter of 2014. The decrease in revenues from games and others was primarily due to a decrease in revenues generated from web-based games on the Company’s game platform.

COST OF REVENUES AND GROSS PROFIT

Cost of revenues for the fourth quarter of 2015 was RMB207.0 million (US\$32.0 million), as compared to RMB207.4 million in the fourth quarter of 2014. The slight decrease in cost of revenues was primarily due to decreases in content and operational costs, bandwidth costs and sales taxes and surcharges, offset by an increase in revenue sharing fees. Revenue sharing fees to telecom operators and channel partners in the fourth quarter of 2015 increased to RMB46.6 million (US\$7.2 million) from RMB35.3 million in the fourth quarter of 2014, mainly due to the increased sales of higher revenue sharing products. Content and operational costs for the fourth quarter of 2015 decreased to RMB106.6 million (US\$16.5 million) from RMB114.4 million in the fourth quarter of 2014, due to the decrease in share-based compensation. Bandwidth costs for the fourth quarter of 2015 decreased to RMB19.7 million (US\$3.0 million) from RMB21.7 million in the fourth quarter of 2014. Sales taxes and surcharges for the fourth quarter of 2015 decreased to RMB34.2 million (US\$5.3 million) from RMB35.9 million in the fourth quarter of 2014. Share-based compensation included in cost of revenues was negative RMB7.3 million (negative US\$1.1 million) in the fourth quarter of 2015, as compared to RMB5.2 million in the fourth quarter of 2014, primarily due to adjustment of the estimated forfeiture rate of share-based awards.

Gross profit for the fourth quarter of 2015 was RMB223.7 million (US\$34.5 million), as compared to RMB230.7 million in the fourth quarter of 2014. Gross margin for the fourth quarter of 2015 was 51.9% as compared to 52.7% in the fourth quarter of 2014. Adjusted gross margin³, which excludes share-based compensation, for the fourth quarter of 2015 was 50.2%, as compared to 53.9% in the fourth quarter of 2014.

¹ MVAS includes wireless value-added services, or WVAS, mobile video, mobile digital reading, mobile games and other paid services through China's three telecom operators' platforms.

² Games and others include web-based games, content sales, and other online and mobile paid services through the Company's own platforms.

³ An explanation of the Company's non-GAAP financial measures is included in the section entitled "Use of Non-GAAP Financial Measures" below, and the related reconciliations to GAAP financial measures are presented in the accompanying "Reconciliations of Non-GAAP Results of Operation Measures to the Nearest Comparable GAAP Measures".

Adjusted operating margin for the fourth quarter of 2015, which excludes share-based compensation, was 7.2%, as compared to 13.6% in the fourth quarter of 2014. The decrease was mainly due to the decrease in adjusted gross margin and the increase in mobile traffic acquisition expenses and bad debt provision.

Use of Non-GAAP Financial Measures

To supplement the consolidated financial statements presented in accordance with the United States Generally Accepted Accounting Principles (“GAAP”), Phoenix New Media Limited uses adjusted gross profit, adjusted gross margin, adjusted income from operations, adjusted operating margin, adjusted net income attributable to Phoenix New Media Limited, adjusted net margin and adjusted net income per diluted ADS, each of which is a non-GAAP financial measure. Adjusted gross profit is gross profit excluding share-based compensation. Adjusted gross margin is adjusted gross profit divided by total revenues. Adjusted income from operations is income from operations excluding share-based compensation. Adjusted operating margin is adjusted income from operations divided by total revenues. Adjusted net income attributable to Phoenix New Media Limited is net income attributable to Phoenix New Media Limited excluding share-based compensation, loss from equity investments, gain on disposition of subsidiaries and acquisition of equity investments, gain on disposal of an equity investment and acquisition of available-for-sale securities, and impairment of equity investments. Adjusted net margin is adjusted net income attributable to Phoenix New Media Limited divided by total revenues. Adjusted net income per diluted ADS is adjusted net income attributable to Phoenix New Media Limited divided by weighted average number of diluted ADSs. The Company believes that separate analysis and exclusion of the non-cash impact of share-based compensation, loss from equity investments, gain on disposition of subsidiaries and acquisition of equity investments, gain on disposal of an equity investment and acquisition of available-for-sale securities, impairment of equity investments add clarity to the constituent parts of its performance. The Company reviews adjusted net income together with net income to obtain a better understanding of its operating performance. It uses these non-GAAP financial measures for planning, forecasting and measuring results against the forecast. The Company believes that using multiple measures to evaluate its business allows both management and investors to assess the Company’s performance against its competitors. The Company also believes that non-GAAP financial measures are useful supplemental information for investors and analysts to assess its operating performance without the effect of non-cash share-based compensation, impairment of equity investments, gain on disposition of subsidiaries and acquisition of equity investments, loss from equity investments and gain on disposal of an equity investment and acquisition of available-for-sale securities. Share-based compensation and loss from equity investments have been and will continue to be significant and recurring in its business. However, the use of non-GAAP financial measures has material limitations as an analytical tool. One of the limitations of using non-GAAP financial measures is that they do not include all items that impact the Company’s net income for the period. In addition, because non-GAAP financial measures are not measured in the same manner by all companies, they may not be comparable to other similarly-titled measures used by other companies. In light of the foregoing limitations, you should not consider non-GAAP financial measure in isolation from, or as an alternative to, the financial measures prepared in accordance with U.S. GAAP.
